

CHRIS TAYLOR

chris.taylor@email.com | (555) 617-2938 | Boston, MA | linkedin.com/in/christaylordev

SUMMARY

Experienced .NET developer with 6 years building enterprise-grade REST APIs, backend services, and data access layers using ASP.NET Core and C#. Skilled in SQL Server database design and query optimization, with a strong foundation in clean code principles and agile delivery.

EXPERIENCE

.NET Developer | Harborview Software

Apr 2021 – Present | Boston, MA

- Designed and built 12 RESTful API services using ASP.NET Core and C#, serving internal microservices and third-party integrations handling 80,000+ daily requests.
- Architected and maintained SQL Server database schemas for 3 production applications, writing complex T-SQL queries, stored procedures, and views for reporting and business logic layers.
- Implemented JWT-based authentication and OAuth 2.0 authorization flows in ASP.NET Core middleware, securing APIs consumed by 4 downstream service teams.
- Wrote C# unit and integration tests covering critical business logic in all owned services, maintaining code coverage above 80% across the team's codebase.
- Collaborated with DevOps to configure Azure-hosted CI/CD pipelines that automated build, test, and deployment stages, cutting manual release effort from 4 hours to 20 minutes.
- Created Swagger/OpenAPI documentation for all 12 services, enabling self-service integration by partner teams and reducing support tickets by 35%.
- Participated in architecture reviews and contributed C# design patterns (Repository, CQRS, Mediator) that were adopted as team standards across 3 squads.

Junior .NET Developer | Concord Technology Group

Jun 2019 – Mar 2021 | Cambridge, MA

- Developed LINQ-based data access layers in C# for a customer management application, replacing raw ADO.NET queries and reducing data-access code volume by 60%.
- Built and maintained SQL Server stored procedures and indexes for a reporting module used by 200+ internal users, improving query performance by 45%.
- Contributed to REST API development using ASP.NET Core, implementing endpoint validation, error handling middleware, and versioning strategies.
- Maintained Git repositories following GitFlow branching strategy, conducting code reviews and providing feedback to 3 junior team members.
- Wrote internal technical documentation for API contracts, SQL schema changes, and deployment runbooks using Swagger and Confluence.

CORE SKILLS

ASP.NET Core
C#
SQL Server
Git
REST APIs
LINQ
Visual Studio

ADDITIONAL SKILLS

JSON / XML
OAuth 2.0 / JWT
Swagger / OpenAPI
Agile / Scrum
Azure (basic)
CI/CD Pipelines
Unit Testing

CERTIFICATIONS

Microsoft Certified:
Azure Developer
Associate (AZ-204)
2023

EDUCATION

B.S. Software
Engineering
Northeastern
University, 2019
