TECHNICAL SKILLS

Container & Orchestration: Docker, Kubernetes

Infrastructure as Code: Terraform

CI/CD: GitLab CI/CD, CircleCI

Cloud: Azure (AKS, VMs, Blob Storage, IAM, Monitor)

Observability: Datadog, Grafana

Scripting & Automation: Bash, Python

Operating Systems: Linux (Ubuntu, Debian, CentOS)

EDUCATION

B.S. Computer Science

University of Texas at Austin

2018

CERTIFICATIONS

Microsoft Certified: Azure DevOps Engineer Expert (2023)

Certified Kubernetes Administrator (CKA) (2022)

HashiCorp Certified: Terraform Associate (2021)

SUMMARY

DevOps Engineer with 6 years of experience building and operating cloud-native infrastructure. Specializes in Kubernetes-based container orchestration, Terraform infrastructure-as-code, and end-to-end CI/CD automation on Azure. Proven track record reducing deployment lead times and improving system observability at mid-scale SaaS companies.

EXPERIENCE

Senior DevOps Engineer — Stackline Technologies, Austin, TX

2022 – Present

- Designed and manage a 40-node AKS cluster on Azure serving 8 microservices with 99.95% uptime
- Authored 25+ reusable Terraform modules covering VNet, AKS, Azure SQL, and IAM baseline patterns
- Migrated 12 legacy CircleCI pipelines to GitLab CI/CD, reducing pipeline execution time by 38%
- Built a Datadog and Grafana observability stack with 200+ custom dashboards and PagerDuty-integrated alerting
- Containerized 8 monolithic services using Docker, reducing environment parity incidents by 70%
- Wrote Bash and Python automation scripts that eliminated 14 hours per week of manual operational toil
- Enforced Linux CIS benchmark hardening across 60+ Azure VMs via scripted policy enforcement

DevOps Engineer — Meridian Cloud Corp, Austin, TX

2019 – 2022

- Built and maintained CI/CD pipelines for 5 product teams using GitLab CI/CD on self-hosted runners
- Managed Docker Compose and early Kubernetes (AKS 1.18) deployments for staging and production
- Automated Azure infrastructure provisioning with Terraform, replacing 3,000 lines of ARM templates
- Configured Datadog APM and Grafana dashboards for API latency and error-rate SLIs
- Wrote Python scripts for log aggregation, cost reporting, and automated VM image rotation
- Maintained Linux server fleet (CentOS 7 and Ubuntu 20.04) including patch management and certificate rotation

Junior Systems Engineer — Rapid Deploy Inc, Austin, TX

2018 – 2019

- Supported Linux server administration and on-call rotation for 200-node bare-metal environment
- Wrote Bash scripts to automate nightly backup verification and disk-health alerting
- Assisted with early Docker containerization of internal tooling
