JavaScript React CSS HTML Git Responsive Design REST APIs JSON Accessibility Figma Webpack npm Cross-browser Testing Agile

PROFESSIONAL SUMMARY

Frontend developer with 6 years of experience building responsive, accessible web applications using React and modern JavaScript. Proven track record of translating design mockups into polished user interfaces and collaborating closely with backend teams on API integration.

EXPERIENCE

Frontend Developer | BrightPath Digital

Mar 2020 – Present | Austin, TX

- Built and maintained 15+ reusable React component libraries used across a suite of customer-facing products, reducing UI development time by 40% across teams.
- Developed fully responsive layouts in CSS and HTML that achieve WCAG 2.1 AA accessibility compliance, expanding the product's eligible user base to government and enterprise clients.
- Integrated RESTful APIs using JavaScript fetch and Axios, handling authentication flows, pagination, and error states for a dashboard used by 12,000 active users.
- Collaborated with UX designers in Figma to prototype and iterate on new features, reducing design-to-development handoff time from 2 weeks to 4 days.
- Led the frontend architecture decision to standardize on React functional components and hooks, migrating 40,000 lines of class-based component code over 3 sprints.
- Implemented lazy loading, code splitting, and Webpack bundle optimization, reducing initial page load time from 4.2s to 1.1s on 3G connections.
- Conducted weekly cross-browser testing across Chrome, Firefox, Safari, and Edge to maintain a <0.1% visual regression rate in production.

Junior Web Developer | Axiom Creative Agency

Jun 2017 – Feb 2020 | San Antonio, TX

- Developed interactive landing pages and campaign microsites using JavaScript, HTML, and CSS for 30+ client brands with turnaround times of 1 to 5 business days.
- Built a JSON-driven content management layer that allowed non-technical marketing staff to update page content without developer involvement, saving 6 hours per week.
- Wrote JavaScript validation and form-submission handling for lead-capture pages generating \$2.4M in annual pipeline.
- Maintained a shared Git repository of reusable UI components, reducing duplicate work across a 5-person frontend team.
- Created accessible HTML email templates compatible with Outlook, Gmail, and Apple Mail for campaigns reaching 200,000+ subscribers.

EDUCATION

B.S. Web Design & Development | Texas State University | 2017
